What's New in the Lotto Assistant RSA Edition?

Lotto Assistant was released in 1997 and was a popular program that could do the following: Lotto Assistant is a self-contained program which does not require access to a database. Lotto Assistant contains the following Lotto type databases: The National Lotto The National Lotto Plus The Power Ball The Super 6, which can be bought separately. You can choose which database to use by the Lotto type you wish to use: You can use just one or all databases to calculate your numbers. You can use one or more databases for statistics - so that way, you can calculate all the information from one or more databases simultaneously. Lotto Assistant has a complex engine. When you first open the application, you have the following options available: select database select number type (simple or advanced) show/hide window show/hide status bar calculate statistics hot/cold numbers search numbers or combined search set number of draws You can then click the number type on the bottom of the screen to select the number type, or use the radio buttons. The number type has the following options: This is the normal radio button option. This is a complex option that can be set to any rule. This is a combination of the above two radio buttons. There are 5 versions of number type: simple advanced five digit ten digit fifteen digit You can have the following radio buttons available: hot numbers cold numbers due numbers overdue numbers hot numbers, cold numbers, hot numbers and cold numbers hot numbers, cold numbers, due numbers, and overdue numbers You can use any combination of numbers for the statistics and you can select different data sets for statistics. The data sets available are: single numbers (1, 2, 3, etc) first 5 numbers (1 to 5) first 10 numbers (1 to 10) first 15 numbers (1 to 15) first 20 numbers (1 to 20) first 25 numbers (1 to 25) first 30 numbers (1 to 30)
